Taxation

Luxembourg offers an attractive tax environment.

As such, the participation exemption regime provides an exemption from income, withholding and net wealth tax for qualifying investments held by qualifying entities (i.e. dividends, capital gains and liquidation proceeds).

A favourable tax regime applicable to intellectual property rights (IP regime) was implemented in Luxembourg and can provide an exemption up to 80% on royalties and capital gains derived from many types of IP rights: patents, designs/models, internet domain names and software copyrights. Nonetheless, IP rights acquired directly from a related party are excluded from the regime.

Furthermore, special tax regimes are available for securitization vehicles (all remuneration paid, including dividends is tax deductible); SICARs (exempt on all income from securities and on transit funds); undertakings for collective investments (SICAVs, SICAFs, and FCPs), specialized investment funds (lightly regulated vehicles) and SPFs (private wealth management vehicles).

In order to avoid the double taxation of the income, Luxembourg has concluded 80 tax treaties.
